FORWARD-LOOKING STATEMENTS

Certain of the statements included in this Quarterly Report on Form 10-Q constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Words such as "expects," "believes," "anticipates," "includes," "plans," "assumes," "estimates," "projects," "intends," "should," "will," "shall" or variations of such words are generally part of forward-looking statements. Forward-looking statements are made based on management's current expectations and beliefs concerning future developments and their potential effects upon Fortitude Life Insurance & Annuity Company (FLIAC). There can be no assurance that future developments affecting FLIAC will be those anticipated by management. These forward-looking statements are not a guarantee of future performance and involve risks and uncertainties, and there are certain important factors that could cause actual results to differ, possibly materially, from expectations or estimates reflected in such forward-looking statements, including, among others: (1) the ongoing impact of the uncertain and evolving economic environment on the global economy, financial markets and our business; (2) losses on investments or financial contracts due to deterioration in credit quality or value, or counterparty default; (3) losses on insurance products due to mortality experience or policyholder behavior experience that differs significantly from our expectations when we price our products; (4) changes in interest rates and equity prices that may (a) adversely impact the profitability of our products, the value of separate accounts supporting these products or the value of assets we manage, (b) result in losses on derivatives we use to hedge risk or increase collateral posting requirements and (c) limit opportunities to invest at appropriate returns; (5) guarantees within certain of our products which are market sensitive and may decrease our earnings or increase the volatility of our results of operations or financial position; (6) liquidity needs resulting from (a) derivative collateral market exposure, (b) asset/liability mismatches, (c) the lack of available funding in the financial markets or (d) unexpected cash demands due to severe mortality calamity or lapse events; (7) financial or customer losses, or regulatory and legal actions, due to inadequate or failed processes or systems, external events, and human error or misconduct such as (a) disruption of our systems and data, (b) an information security breach, (c) a failure to protect the privacy of sensitive data, (d) reliance on third-parties or (e) labor and employment matters; (8) changes in the regulatory landscape, including related to (a) financial sector regulatory reform, (b) changes in tax laws, (c) fiduciary rules and other standards of care, (d) state insurance laws and developments regarding group-wide supervision, capital and reserves, or (e) privacy and cybersecurity regulation; (9) technological changes which may adversely impact companies in our investment portfolio or cause insurance experience to deviate from our assumptions; (10) ratings downgrades; (11) market conditions that may adversely affect the sales or persistency of our products; (12) competition; and (13) reputational damage. FLIAC does not intend, and is under no obligation, to update any particular forward-looking statement included in this document. See "Risk Factors" included in the Annual Report on Form 10-K for the year ended December 31, 2023 for discussion of certain risks relating to our business.

- During the six months ended June 30, 2023, we had novations within our Ceded Business related to variable-indexed annuities under the reinsurance agreement with Pruco Life Insurance Company that resulted in non-cash transactions of \$343 million of investments with a corresponding offset of \$343 million to the modified coinsurance payable.
- There was no significant non-cash novation activity during the six months ended June 30, 2024.

Notes to Unaudited Interim Consolidated Financial Statements

1. BUSINESS AND BASIS OF PRESENTATION

Fortitude Life Insurance & Annuity Company and its wholly-owned subsidiary (collectively, "FLIAC" or the "Company"), with its principal offices in Jersey City, New Jersey, is a wholly-owned subsidiary of Fortitude Group Holdings, LLC ("FGH").

Basis of Presentation

The Unaudited Interim Consolidated Financial Statements have been prepared in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP") on a basis consistent with reporting interim financial information in accordance with instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission ("SEC"). The accompanying Unaudited Consolidated Financial Statements present the consolidated results of operations, financial condition, and cash flows of FLIAC. All intercompany transactions have been eliminated in consolidation.

In the opinion of management, all adjustments necessary for a fair statement of the financial position and results of operations have been made. All such adjustments are of a normal, recurring nature. Interim results are not necessarily indicative of the results that may be expected for the full year. These financial statements should be read in conjunction with the Company's Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2023.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Novation of Ceded Business

In 2022, in accordance with applicable state law, a program was instituted to novate a significant portion of the Ceded Business policies from FLIAC to Pruco Life Insurance Company ("Pruco Life"). The program did not have an impact on total equity or net income but has resulted in the reduction of certain activity/balances associated with these policies. During the three and six months ended June 30, 2023, approximately \$451 million and \$458 million, respectively, of account value which generally approximates fair values of insurance liabilities, was transferred out of the Company as a result of the novation program.

There was no significant novation activity during the three and six months ended June 30, 2024 and we do not expect significant future novation activity under the current program. Since the acquisition of the Company on April 1, 2022, approximately 73 percent of account value in the Ceded Business has been novated to Pruco Life under this program.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current period presentation. The Company reclassified net proceeds related to repurchase agreements by disaggregating the cash flows related to repurchase agreements with original maturity dates greater than 90 days from those with original maturity dates less than 90 days within the Consolidated Statements of Cash Flows.

Notes to Unaudited Interim Consolidated Financial Statements

2. SIGNIFICANT ACCOUNTING POLICIES AND PRONOUNCEMENTS

Accounting Policy Election

Fair Value Option

We have elected to apply the fair value option to several of FLIAC's assets and liabilities. We have made this election as it improves our operational efficiency and better aligns the recognition and measurement of our investments, insurance liabilities, and associated reinsurance activity with how we expect to manage the business. See Note 4 herein and Notes 2 and 4 in the Company's Annual Report on Form 10-K for the year ended December 31, 2023 for further information.

Recent Accounting Pronouncements

Changes to U.S. GAAP are established by the Financial Accounting Standards Board ("FASB") in the form of an Accounting Standards Update ("ASU") to the Accounting Standards Codification ("ASC"). We consider the applicability and impact of all ASUs. ASUs listed below include those that have been adopted during the current fiscal year and/or those that have been issued but not yet adopted as of the date of this filing. ASUs not listed below were assessed and determined to be either not applicable or not material.

ASUs issued but not yet adopted as of June 30, 2024:

Standard	Description	Effective date and method of adoption	Effect on the financial statements or other significant matters
ASU 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures	This ASU improves reportable segment disclosure requirements, primarily through enhanced disclosures regarding a company's significant segment expenses and certain other items. The update will also require expanded disclosures regarding the chief operating decision maker (CODM) and the information they are provided when assessing segment performance and allocating resources.	Effective for annual reporting periods beginning January 1, 2024, and interim reporting periods beginning January 1, 2025, using the retrospective method. Early adoption is permitted	The update is expected to expand the Company's disclosures but will not have an impact on the Company's financial position or results of operations.
ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures	This ASU improves income tax disclosure requirements by requiring 1. the use of consistent categories and greater disaggregation of information in the rate reconciliation and 2. income taxes paid disaggregated by jurisdiction.	Effective for annual reporting periods beginning January 1, 2025, and is required to be applied prospectively with the option of retrospective application. Early adoption is permitted.	The update is expected to expand the Company's disclosures but will not have an impact on the Company's financial position or results of operations.

Notes to Unaudited Interim Consolidated Financial Statements

3. SEGMENT INFORMATION

FLIAC has two reportable segments, which we refer to as the "Retained Business" and the "Ceded Business."

The Retained Business consists of variable annuity products with guaranteed lifetime withdrawal benefit features as well as smaller blocks of variable annuity products with certain other living benefit and death benefit features. The Retained Business also includes variable universal life and fixed payout annuity products. The Retained Business is actively managed by FLIAC management and we retain the full economic benefits and risks.

The Ceded Business represents certain business (primarily registered index-linked annuities and fixed annuities, which includes fixed indexed and fixed deferred annuities, and other variable annuities) where 100 percent of the assets and liabilities have been fully ceded to Prudential Insurance and Pruco Life under existing coinsurance and modified coinsurance agreements. At June 30, 2024 and December 31, 2023, we had a modified coinsurance payable of \$1,726 million and \$1,603 million, respectively, equal to the assets held in the Ceded Business, and are included in the net modified coinsurance payable.

Notes to Unaudited Interim Consolidated Financial Statements

4. FAIR VALUE OF ASSETS AND LIABILITIES

Fair Value Measurement – Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The authoritative fair value guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1 - Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities.

Level 2 - Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities, and other market observable inputs.

Level 3 - Fair value is based on at least one significant unobservable input for the asset or liability. The assets and liabilities in this category may require significant judgment or estimation in determining the fair value.

For a discussion of the Company's valuation methodologies for assets and liabilities measured at fair value and the fair value hierarchy, see Note 4 to the Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2023.

Fair Value Option Election

We have elected to adopt the fair value option for several of our financial assets and liabilities. The following are the financial assets and liabilities for which we have elected the fair value option. See Notes 2 and 4 to the Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2023 for further information.

- Fixed maturity securities
- Mortgage loans
- Reinsurance recoverables
- Separate account assets and liabilities
- Net modified coinsurance receivable/payable
- Deposit asset
- Insurance liabilities

Notes to Unaudited Interim Consolidated Financial Statements

Assets and Liabilities by Hierarchy Level – The tables below present the balances of assets and liabilities reported at fair value on a recurring basis, as of the dates indicated.

^{(1) &}quot;Netting" amounts represent offsetting considerations as disclosed in Note 6.

Excluded from the above chart are private equity funds, which are classified as other invested assets on the Consolidated Statements of Financial Position, and certain fixed maturity securities, for which fair value is measured at net asset value ("NAV") per share (or its equivalent) as a practical expedient. At June 30, 2024 the fair values of these private equity funds and fixed maturity securities were \$29 million and \$10 million, respectively.

⁽²⁾ Includes credit-tranched securities collateralized by syndicated bank loans, sub-prime mortgages, auto loans, credit cards, education loans and other asset types.

⁽³⁾ As of June 30, 2024, the aggregate fair value of mortgage loans was lower than the aggregate unpaid principal by \$2 million.

^{(1) &}quot;Netting" amounts represent offsetting considerations as disclosed in Note 6.

Excluded from the above chart are private equity funds, which are classified as other invested assets on the Consolidated Statements of Financial Position, and certain fixed maturity securities, for which fair value is measured at net asset value ("NAV") per share (or its equivalent) as a practical expedient. At December 31, 2023 the fair values of these private equity funds and fixed maturity securities were \$24 million and \$8 million, respectively.

⁽²⁾ Includes credit-tranched securities collateralized by syndicated bank loans, sub-prime mortgages, auto loans, credit cards, education loans and other asset types.

⁽³⁾ As of December 31, 2023, the difference between the aggregate fair value and the aggregate unpaid principal of mortgage loans was de minimis.

Quantitative Information Regarding Internally Priced Level 3 Assets and Liabilities – The tables below present information about the significant unobservable inputs used for recurring fair value measurements regarding certain Level 3 assets and liabilities. Excluded from the tables are assets that are externally priced and for which information about the inputs is not readily available to the Company, accordingly, certain fair value amounts may not reconcile to the "Assets and Liabilities by Hierarchy Level" tables disclosed earlier in this footnote.

- (1) Conversely, the impact of a decrease in input would have the opposite impact on fair value as that presented in the table.
- (2) The equity volatility curve assumption is based on 1 year and 2 year index-specific at-the-money implied volatilities grading to 10 year total variance. Increased volatility increases the fair value of the liability.
- (3) Lapse rates for contracts with living benefit guarantees are adjusted at the contract level based on the in-the-moneyness of the living benefit and reflect other factors, such as the applicability of any surrender charges. Lapse rates are reduced when contracts are more in-the-money. Lapse rates for contracts with index-linked crediting guarantees may be adjusted at the contract level based on the applicability of any surrender charges, product type, and market related factors such as interest rates. Lapse rates are also generally assumed to be lower for the period where surrender charges apply.
- (4) The spread over the risk-free rate swap curve represents the premium added to the proxy for the risk-free rate to reflect the Company's estimates of rates that a market participant would use to value the living benefits in both the accumulation and payout phases and index-linked interest crediting guarantees. This spread includes an estimate of own-credit risk (OCR), which is the risk that the obligation will not be fulfilled by the Company. OCR is primarily estimated by utilizing the credit spreads associated with issuing funding agreements, adjusted for any illiquidity risk premium. In order to reflect the financial strength ratings of the Company, credit spreads associated with funding agreements, as opposed to credit spread associated with debt, are utilized in developing this estimate because funding agreements, living benefit guarantees, and index-linked interest crediting guarantees are insurance liabilities and are therefore senior to debt.
- (5) The utilization rate assumption estimates the percentage of contracts that will utilize the benefit during the contract duration and begin lifetime withdrawals at various time intervals from contract inception. Utilization assumptions may vary by product type, tax status and age. The impact of changes in these assumptions is highly dependent on the product type, the age of the contractholder at the time of the sale, and the timing of the first lifetime income withdrawal.

Notes to Unaudited Interim Consolidated Financial Statements

- (6) The withdrawal rate assumption estimates the magnitude of annual contractholder withdrawals relative to the maximum allowable amount under the contract. These assumptions vary based on the age of the contractholder, the tax status of the contract and the duration since the contractholder began lifetime withdrawals. As of June 30, 2024 and December 31, 2023, the minimum withdrawal rate assumption is 88% and the maximum withdrawal rate assumption may be greater than 100%. The fair value of the liability will generally increase the closer the withdrawal rate is to 100% and decrease as the withdrawal rate moves further away from 100%.
- (7) The range reflects the mortality rates for the vast majority of business with living benefits, with policyholders ranging from 45 to 90 years old. While the majority of living benefits have a minimum age requirement, certain other contracts do not have an age restriction. This results in contractholders with mortality rates approaching 0% for certain benefits.

Interrelationships Between Unobservable Inputs – In addition to the sensitivities of fair value measurements to changes in each unobservable input in isolation, as reflected in the table above, interrelationships between these inputs may also exist, such that a change in one unobservable input may give rise to a change in another, or multiple, inputs. Examples of such interrelationships for significant internally-priced Level 3 assets and liabilities are as follows:

Corporate Securities – The rate used to discount future cash flows reflects current risk-free rates plus credit and liquidity spread requirements that market participants would use to value an asset. The discount rate may be influenced by many factors, including market cycles, expectations of default, collateral, term and asset complexity. Each of these factors can influence discount rates, either in isolation, or in response to other factors. During weaker economic cycles, as the expectations of default increases, credit spreads widen, which results in a decrease in fair value.

Insurance Liabilities, at fair value – The Company expects efficient benefit utilization and withdrawal rates to generally be correlated with lapse rates. However, behavior is highly dependent on the facts and circumstances surrounding the individual contractholder, such as their liquidity needs or tax situation, which could drive lapse behavior independent of other contractholder behavior assumptions. To the extent that more efficient contractholder behavior results in greater in-themoneyness at the contract level, lapse rates may decline for those contracts. Similarly, to the extent that increases in equity volatility are correlated with overall declines in the capital markets, lapse rates may decline as contracts become more in-themoney.

Changes in Level 3 Assets and Liabilities – The following tables describe changes in fair values of Level 3 assets and liabilities, by business segment, and in the aggregate. In addition, the following tables include the portion of gains or losses included in income attributable to unrealized gains or losses related to those assets and liabilities still held at the end of their respective periods. When a determination is made to classify assets and liabilities within Level 3, the determination is based on significance of the unobservable inputs in the overall fair value measurement. All transfers are based on changes in the observability of the valuation inputs, including the availability of pricing service information that the Company can validate. Transfers into Level 3 are generally the result of unobservable inputs utilized within valuation methodologies and the use of indicative broker quotes for assets that were previously valued using observable inputs. Transfers out of Level 3 are generally due to the use of observable inputs in valuation methodologies as well as the availability of pricing service information for certain assets that the Company can validate.

"Total realized and unrealized gains (losses)" related to our level 3 assets are included in earnings in Investment gains (losses). Activity related to our level 3 liabilities is primarily recognized in earnings within change in Policyholder benefits and changes in fair value of insurance liabilities with the exception of changes related to the Company's own-credit risk, which are included in "Change in fair value (discount rate)" above and recorded in other comprehensive income (loss).

Notes to Unaudited Interim Consolidated Financial Statements

Change in Fair Value of Insurance Contracts

The components of the change in fair value of our insurance contracts are reported in several line items within Revenues and Benefits and expenses in our Consolidated Statements of Income and Comprehensive Income (Loss). The revenue items include Premiums, Policy charges and fee income, and Asset management and service fees. The Benefits and expenses items include Policyholders' benefits and changes in fair value of insurance liabilities and commission expense. Policyholder benefits and changes in fair value of insurance liabilities includes the following changes in fair value of the assets and liabilities for which we have elected the fair value option:

Deposit asset	_		(34)	(34)			(169)		(169)
Liabilities:									
Insurance liabilities	\$ (602)	\$	(15) \$	(617)	\$	(106) \$	(437)	\$	(543)

Changes in insurance liabilities attributable to the Company's own-credit risk are recorded in other comprehensive income (loss). Changes in the modified coinsurance payable are reported in Policyholder benefits and changes in fair value of insurance liabilities, however, they are not included in the above chart as they relate to the investment portfolio within the modified coinsurance agreement.

Fair Value of Financial Instruments

The table below presents the carrying amount and fair value by fair value hierarchy level of certain financial instruments that are not reported at fair value. The financial instruments presented below are reported at carrying value on the Company's Consolidated Statements of Financial Position. In some cases the carrying amount equals or approximates fair value.

				Ju	ine 30, 2024		
			Fair	Valu	ue		Carrying Amount

Secured Borrowing Arrangements

In the normal course of business, FLIAC sells securities under agreements to repurchase and enters into securities lending transactions. These balances are recorded within "Liabilities associated with secured borrowing arrangements" in the Consolidated Statements of Financial Position.

Repurchase Agreements

The following table sets forth, by type, the securities that we have agreed to repurchase, all of which are contained in the Retained Business. The below amounts represent the cash received under the outstanding repurchase agreements.

	June 30, 2024								December 31, 2023								
	Up to 30 days		30 days up to 1 year		1-5 years		,	Total	-	Up to 30 days		30 days up to 1 year		1-5 years		Total	
	(in millions)																
U.S. corporate public securities	\$	217	\$	402	\$	502	\$	1,121	\$	356	\$	108	\$	503	\$	967	

The market value of the securities posted as collateral under the repurchase agreements was \$1,149 million and \$999 million as of June 30, 2024 and December 31, 2023, respectively.

During the six months ended June 30, 2024, the Company returned a net \$46 million of fixed maturity securities and short-term investments that were received as collateral, on a non-cash basis, related to liabilities associated with repurchase agreements. During the six months ended June 30, 2023, the Company returned \$11 million of fixed maturity securities that were received as collateral, on a non-cash basis, related to liabilities associated with repurchase agreements.

Notes to Unaudited Interim Consolidated Financial Statements

Securities Lending Transactions

As of June 30, 2024 there were \$2 million of liabilities associated with securities lending transactions, all of which are included in the Ceded Business. The remaining contractual maturity of these liabilities are within the range of 30 days up to 1 year. The market value of the U.S corporate public debt securities that were loaned under these transactions was \$2 million. There were no outstanding securities lending agreements as of December 31, 2023.

6. DERIVATIVES AND HEDGING

Types of Derivative Instruments and Derivative Strategies

The Company utilizes various derivative instruments and strategies to manage its risk. Commonly used derivative instruments include but are not necessarily limited to:

- Interest rate contracts: swaps, swaptions, futures, forwards, options, caps and floors
- Equity contracts: futures, options, and total return swaps
- Foreign exchange contracts: futures, options, forwards and swaps

See below for information on these contracts and the related strategies.

Interest Rate Contracts

Interest rate swaps, options, and futures are used by the Company to reduce risks from changes in interest rates, manage interest rate exposures arising from mismatches between assets and liabilities and to hedge against changes in their values it owns or anticipates acquiring or selling.

Interest rate swaps may be attributed to specific assets or liabilities or to a portfolio of assets or liabilities. The Company agrees with counterparties to exchange, at specified intervals, the difference between fixed-rate and floating-rate interest amounts calculated by reference to an agreed upon notional principal amount.

Interest rate options include swaptions and interest rate floors. Swaptions are options that give the holder the right but not obligation to enter into a specified interest rate swap. The Company uses these instruments for protection against the direction of future interest rates. Interest rate floors set an effective rate of interest on underlying reference rate and are used by the Company to provide protection against potential future declines in rates.

In standardized exchange-traded interest rate futures transactions, the Company purchases or sells a specified number of contracts, the values of which are determined by the daily market values of underlying referenced investments. The Company enters into exchange-traded futures with regulated futures commission's merchants who are members of a trading exchange.

Equity Contracts

Equity options, total return swaps, and futures are used by the Company to manage its exposure to the equity markets which impacts the value of assets and liabilities it owns or anticipates acquiring or selling.

Equity options are contracts which will settle in cash based on differentials in the underlying indices at the time of exercise and the strike price. The Company uses combinations of purchases and sales of equity index options to hedge the effects of adverse changes in equity indices within a predetermined range.

Total return swaps are contracts whereby the Company agrees with counterparties to exchange, at specified intervals, the difference between the return on an asset (or market index) and Secured Overnight Financing Rate ("SOFR") plus an associated funding spread based on a notional amount. The Company generally uses total return swaps to hedge the effect of adverse changes in equity indices.

In standardized exchange-traded equity futures transactions, the Company purchases or sells a specified number of contracts, the values of which are determined by the daily market values underlying referenced equity indices. The Company enters into exchange-traded futures with regulated futures commission's merchants who are members of a trading exchange.

Notes to Unaudited Interim Consolidated Financial Statements

Foreign Exchange Contracts

Currency derivatives, including currency swaps and forwards, are used by the Company to reduce risks from changes in currency exchange rates with respect to investments denominated in foreign currencies that the Company either holds or intends to acquire or sell.

Under currency forwards, the Company agrees with counterparties to deliver a specified amount of an identified currency at a specified future date. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at the specified future date. The Company executes forward sales of the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these forwards correspond with the future periods in which the non-U.S. dollar-denominated earnings are expected to be generated.

Under currency swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between one currency and another at an exchange rate and calculated by reference to an agreed principal amount. Generally, the principal amount of each currency is exchanged at the beginning and termination of the currency swap by each party.

Primary Risks Managed and/or Accessed by Derivatives

The tables below provide a summary, by operating segment, of the gross notional amount and fair value of derivative contracts, by the primary underlying risks. Many derivative instruments contain multiple underlying risks. The fair value amounts below represent the value of derivative contracts prior to taking into account the netting effects of master netting agreements and cash collateral.

Notes to Unaudited Interim Consolidated Financial Statements

The Company is exposed to credit-related losses in the event of non-performance by counterparties to financial derivative transactions with a positive fair value. FLIAC manages credit risk by (i) entering into derivative transactions with highly rated major international financial institutions and other creditworthy counterparties governed by master netting agreement, as applicable; (ii) trading through central clearing and OTC parties; (iii) obtaining collateral, such as cash and securities, when appropriate; and (iv) setting limits on single-party credit exposures which are subject to periodic management review. Substantially all of the Company's derivative agreements have zero thresholds which require daily full collateralization by the party in a liability position.

For securities sold under agreements to repurchase, the Company monitors the value of the securities and maintains collateral, as appropriate, to protect against credit exposure. Where the Company has entered into repurchase agreements with the same counterparty, in the event of default, the Company would generally be permitted to exercise rights of offset. For additional information on the Company's accounting policy for securities repurchase and resale agreements, see Note 2 to the Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2023.

Notes to Unaudited Interim Consolidated Financial Statements

7. INCOME TAXES

The Company uses a full year projected effective tax rate approach to calculate taxes. In addition, certain items impacting total income tax expense are recorded in the periods in which they occur. The projected effective tax rate is the ratio of projected "Income tax expense (benefit)" divided by projected "Income (loss) from operations before income taxes."

For the three months ended June 30, 2024, the Company's income tax provision amounted to an income tax benefit of approximately \$3 million, or 9.1 percent of loss from operations before income taxes. For the six months ended June 30, 2024, the Company's income tax provision amounted to an income tax expense of approximately \$21 million, or 15.4 percent of income from operations before income taxes. The effective tax rate differed from the U.S. statutory tax rate of 21 percent in each period due primarily to non-taxable investment income, intercompany cost allocations, and the deductible foreign taxes paid and accrued.

For the three months ended June 30, 2023, the Company's income tax provision amounted to an income tax expense of approximately \$25 million, or 16.1 percent of income from operations before income tax. For the six months ended June 30, 2023, the Company's income tax provision amounted to an income tax expense of approximately \$25 million or 15.4 percent of income from operations before income taxes. The effective tax rate differed from the U.S. statutory tax rate of 21 percent in each period due primarily to non-taxable investment income and a decrease in the valuation allowance on deferred tax assets.

Valuation Allowance on Deferred Tax Assets

The application of U.S. GAAP requires the evaluation of the recoverability of deferred tax assets and establishment of a valuation allowance, if necessary, to reduce the deferred tax asset to an amount that is more likely than not expected to be realized, including an assessment of the character of future income necessary to realize a deferred tax asset. As of both June 30, 2024 and December 31, 2023, the Company had a valuation allowance of \$36 million regarding realized and unrealized capital losses on our fixed maturity securities portfolio. A portion of the deferred tax asset relates to unrealized capital losses for which the carryforward period has not yet begun, and as such, when assessing its recoverability, we consider our ability and intent to hold the underlying securities to recovery. The amount of the deferred tax asset considered realizable may be adjusted if projections of future taxable income, including the character of that taxable income during the requisite carryforward period, are updated or if objective negative evidence exists that outweighs the positive evidence.

8. EQUITY

Dividends and Distributions to Parent

During the first quarter of 2024, a \$150 million dividend was approved by the Company's board of directors, \$75 million of which was considered an ordinary dividend and was not subject to approval by the Arizona Department of Insurance and Financial Institutions ("DIFI") prior to payment and was accrued for as of March 31, 2024. The other \$75 million was conditioned upon the Company receiving written approval from the Arizona DIFI prior to payment and was not accrued for as of March 31, 2024. In April 2024, the Company received written approval from the Arizona DIFI and the \$150 million dividend was distributed in cash to FGH in the second quarter of 2024.

During the first quarter of 2023, the Company established a \$45 million distribution payable to its parent company, FGH, as a result of updated information regarding certain tax assets related to the acquisition of FLIAC, which resulted in an offsetting reduction to "Additional paid-in capital". The distribution payable was settled during the second quarter of 2023.

Notes to Unaudited Interim Consolidated Financial Statements

Accumulated Other Comprehensive Income (Loss)

Accumulated other comprehensive income (AOCI) represents the cumulative other comprehensive income (OCI) items that are reported separate from net income and detailed on the Consolidated Statements of Operations and Comprehensive Income (Loss).

AOCI is comprised entirely of changes in own-credit risk related to insurance liabilities. The balance of and changes in each component of AOCI are as follows:

	Changes in Own-Credit Risk Related to Insurance Liabilities
	(in millions)
Balance, December 31, 2023	\$ (65)
Change in OCI	(13)

Balance, March 31, 2023	\$ 128
Change in OCI	(115)
Less: Income tax benefit	(25)
Balance, June 30, 2023	\$ 38

9. COMMITMENTS AND CONTINGENT LIABILITIES

Commitments

As of June 30, 2024, the Company had commitments totaling \$280 million to purchase or fund investments related to private fixed maturity securities and mortgage loans. These amounts include unfunded commitments that are not unconditionally cancellable. See Note 10 for further information regarding certain commitments to related parties.

Contingent Liabilities

On an ongoing basis, the Company and its regulators review its operations including, but not limited to, sales and other customer interface procedures and practices, and procedures for meeting obligations to its customers and other parties. These reviews may result in the modification or enhancement of processes or the imposition of other action plans, including concerning management oversight, sales and other customer interface procedures and practices, and the timing or computation of payments to customers and other parties. In certain cases, if appropriate, the Company may offer customers or other parties remediation and may incur charges, including the cost of such remediation, administrative costs and regulatory fines.

The Company is subject to the laws and regulations of states and other jurisdictions concerning the identification, reporting and escheatment of unclaimed or abandoned funds, and is subject to audit and examination for compliance with these requirements. For additional discussion of these matters, see "Litigation and Regulatory Matters" below.

It is possible that the results of operations or the cash flows of the Company in a particular quarterly or annual period could be materially affected as a result of payments in connection with the matters discussed above or other matters depending, in part, upon the results of operations or cash flows for such period. Management believes, however, that ultimate payments in

Notes to Unaudited Interim Consolidated Financial Statements

connection with these matters, after consideration of applicable reserves and rights to indemnification, should not have a material adverse effect on the Company's financial position.

Litigation and Regulatory Matters

The Company is subject to legal and regulatory actions in the ordinary course of its business. Pending legal and regulatory actions include proceedings specific to the Company and proceedings generally applicable to business practices in the industry in which it operates. The Company is subject to class action lawsuits and other litigation involving a variety of issues and allegations involving sales practices, claims payments and procedures, premium charges, policy servicing and breach of fiduciary duty to customers. The Company is also subject to litigation arising out of its general business activities, such as its investments, contracts, leases and labor and employment relationships, including claims of discrimination and harassment, and could be exposed to claims or litigation concerning certain business or process patents. In addition, the Company, along with other participants in the businesses in which it engages, may be subject from time to time to investigations, examinations and inquiries, in some cases industry-wide, concerning issues or matters upon which such regulators have determined to focus. In some of the Company's pending legal and regulatory actions, parties are seeking large and/or indeterminate amounts, including punitive or exemplary damages. The outcome of litigation or a regulatory matter, and the amount or range of potential loss at any particular time, is often inherently uncertain.

The Company establishes accruals for litigation and regulatory matters when it is probable that a loss has been incurred and the amount of that loss can be reasonably estimated. For litigation and regulatory matters where a loss may be reasonably possible, but not probable, or is probable but not reasonably estimable, no accrual is established, but the matter, if material, is disclosed. The Company estimates that as of June 30, 2024, the aggregate range of reasonably possible losses in excess of accruals and recoveries from unaffiliated indemnitors established for those litigation and regulatory matters for which such an estimate currently can be made is not considered to be material. This estimate is not an indication of expected loss, if any, or the Company's maximum possible loss exposure on such matters. The Company reviews relevant information with respect to its litigation and regulatory matters on a quarterly and annual basis and updates its accruals, disclosures and estimates of reasonably possible loss based on such reviews.

Regulatory

Variable Products

Prior to its acquisition by FGH, the Company has received regulatory inquiries and requests for information from state and federal regulators, including a subpoena from the U.S. Securities and Exchange Commission, concerning the appropriateness of variable product sales and replacement activity. The Company is cooperating with regulators and may become subject to additional regulatory inquiries and other actions related to this matter.

Summary

The Company's litigation and regulatory matters are subject to many uncertainties, and given their complexity and scope, their outcome cannot be predicted. It is possible that the Company's results of operations or cash flows in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flows for such period. In light of the unpredictability of the Company's litigation and regulatory matters, it is also possible that in certain cases an ultimate unfavorable resolution of one or more pending litigation or regulatory matters could have a material adverse effect on the Company's financial statements. Management believes, however, that, based on information currently known to it, the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification, is not likely to have a material adverse effect on the Company's financial statements.

Notes to Unaudited Interim Consolidated Financial Statements

10. RELATED PARTY TRANSACTIONS

The Company has transactions and relationships with affiliates. Although we seek to ensure that these transactions and relationships are fair and reasonable, it is possible that the terms of these transactions are not the same as those that would result from transactions among unrelated parties.

Expense Charges and Allocations

The majority of the Company's expenses are allocations or charges from FGH. These expenses primarily relate to general and administrative expenses which include accounting, actuarial, risk management, and data processing services. FGH also provides the Company with personnel and certain other services. The allocation of costs for other services are based on estimated level of usage, transactions or time incurred in providing the respective services. During the three and six months ended June 30, 2024, FLIAC was allocated \$12 million and \$21 million, respectively, of costs for these services. During the three and six months ended June 30, 2023, FLIAC was allocated \$9 million and \$17 million, respectively, of costs for these services.

Intercompany Liquidity Agreement

FLIAC entered into an intercompany liquidity agreement with FGH that allows the Company to borrow or loans funds of up to \$300 million to meet the short-term liquidity and other capital needs of itself and FGH and its affiliates.

The Company did not borrow or loan any funds under the agreement during the six months ended June 30, 2024. During the six months ended June 30, 2023, the Company borrowed a total of \$200 million of funds under the agreement, of which \$80 million was outstanding at June 30, 2023 but was subsequently repaid in full, plus interest, in July 2023.

Affiliated Investment and Advisory Activities

As of April 1, 2022, FLIAC became affiliated with The Carlyle Group Inc. ("Carlyle"), whereby Carlyle, through an affiliated investment fund has a 38.5% equity investment in its parent, FGH. In addition, FLIAC entered into an investment management and consulting services agreement with an affiliate of Carlyle.

Certain of Carlyle's affiliates also provide investment management services for FLIAC pursuant to investment management agreements. Investment management fees are charged based on a percentage of assets under management. As of June 30, 2024 and December 31, 2023, assets under management had a market value of \$562 million and \$529 million, respectively, and were comprised primarily of private credit fixed income assets. FLIAC recognized \$11 million and \$22 million of investment income on such assets during the three and six months ended June 30, 2024, respectively. FLIAC recognized \$6 million and \$11 million of net investment income on such assets during the three and six months ended June 30, 2023., respectively.

In connection with the investment management agreements, as of June 30, 2024, FLIAC has unfunded commitments of \$93 million to fund private investments where one or more Carlyle entities serves as general partner to the fund.

Affiliated Asset Transfers

The Company may participate in affiliated asset transfers with its parent and affiliates. Book and market value differences for trades with its parent and affiliates are recognized within "Investment gains (losses), net". The table below shows affiliated asset trades for the six months ended June 30, 2023. There were no affiliated asset transfers during the six months ended June 30, 2024.

Affiliate	Date	Transaction	Security Type	Fair Value	_		vestment Gains (Losses), Net
						(in million	s)
Fortitude Re Investments, LLC	May 2023	Sale	Limited Partnership	\$ 12	\$	12 \$	_
Fortitude Re Investments, LLC	May 2023	Sale	Limited Partnership	7		7	_

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Fortitude Life Insurance & Annuity Company and its wholly-owned subsidiary (collectively, "FLIAC" or the "Company"), with its principal offices in Jersey City, New Jersey, is a wholly-owned subsidiary of Fortitude Group Holdings, LLC ("FGH").

The following analysis of our financial condition and results of operations should be read in conjunction with the MD&A, the "Risk Factors" section, and the audited Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2023, as well as the statements under "Forward-Looking Statements", and the Unaudited Interim Consolidated Financial Statements included elsewhere in this Quarterly Report on Form 10-Q.

Overview

The Company was established in 1969 and has been a provider of annuity contracts for the individual market in the United States. The Company's products have been sold primarily to individuals to provide for long-term savings and retirement needs and to address the economic impact of premature death, estate planning concerns and supplemental retirement income.

The Company has sold a wide array of annuities, including deferred and immediate variable annuities with (1) fixed interest rate allocation options, subject to a market value adjustment, that are registered with the United States Securities and Exchange Commission (the "SEC"), and (2) fixed-rate allocation options subject to a limited market value adjustment or no market value adjustment and not registered with the SEC. The Company ceased offering these products.

Group Supervision Updates

Effective April 1, 2024, the Bermuda Monetary Authority ("BMA") made a final determination that it is appropriate for the BMA to be the group supervisor for FGH Parent, L.P. and its subsidiaries (collectively, "Fortitude Re"). FGH Parent, L.P. is a Bermuda-domiciled exempted limited partnership, which serves as the holding company for the Company and its affiliates. As a result of the BMA's determination to be group supervisor of Fortitude Re, Fortitude Re will be subject to group capital standards, additional examination as an insurance group, and participation in supervisory college activities as determined by the BMA and other competent authorities supervising the entities in the insurance group. The Arizona Department of Insurance and Financial Institutions ("DIFI") will remain the supervisor of FLIAC and its affiliated U.S. insurance subsidiaries within Fortitude Re and will coordinate its activities with the BMA regarding overall supervision of Fortitude Re. At this time, we are in the process of determining the additional costs and impacts resulting from the BMA's designation as group supervisor for Fortitude Re.

Novation of Ceded Business

In 2022, in accordance with applicable state law, a program was instituted to novate a significant portion of the Ceded Business policies from FLIAC to Pruco Life Insurance Company ("Pruco Life"). The program did not have an impact on total equity or net income but has resulted in the reduction of certain activity/balances associated with these policies. During the three and six months ended June 30, 2023, approximately \$451 million and \$458 million, respectively, of account value which generally approximates fair values of insurance liabilities, was transferred out of the Company as a result of the novation program.

There was no significant novation activity during the three and six months ended June 30, 2024 and we do not expect significant future novation activity under the current program. Since the acquisition of the Company on April 1, 2022, approximately 73 percent of account value in the Ceded Business has been novated to Pruco Life under this program.

Impact of a Changing Interest Rate Environment

As a financial services company, market interest rates are a key driver of our results of operations and financial condition. Changes in interest rates can affect our results of operations and/or our financial condition in several ways, including favorable or adverse impacts to:

- investment-related activity, including: investment income returns, net interest margins, net investment spread results, new money rates, mortgage loan prepayments and bond redemptions;
- the recoverability of deferred tax assets related to losses on our fixed maturity securities portfolio;
- hedging costs and other risk mitigation activities;
- insurance reserve levels and market experience true-ups;
- customer account values, including their impact on fee income;
- product design features, crediting rates and sales mix; and
- policyholder behavior, including surrender or withdrawal activity.

For more information on interest rate risks, see "Risk Factors—Market Risk" included in the Company's Annual Report on Form 10-K for the year ended December 31, 2023.

Revenues and Expenses

The Company earns revenues principally from contract fees, mortality and expense fees, and asset administration fees from annuity and investment products, all of which primarily result from the sale and servicing of annuity products. The Company also earns net investment income from the investment of general account and other funds. The Company's operating expenses principally consist of annuity benefit guarantees provided, reserves established for anticipated future annuity benefit guarantees, and costs of managing risk related to these products. The Company's operating expenses also include general business expenses, reinsurance premiums, and commissions and other costs of selling and servicing the various products it sold.

Accounting Policies & Pronouncements

Application of Critical Accounting Estimates

The preparation of financial statements in conformity with U.S. GAAP requires the application of accounting policies that often involve a significant degree of judgment. Management on an ongoing basis, reviews estimates and assumptions used in the preparation of financial statements. If management determines that modifications in assumptions and estimates are appropriate given current facts and circumstances, the Company's results of operations and financial position as reported in the Unaudited Consolidated Interim Financial Statements could change significantly.

Management believes the accounting policies relating to the following areas are most dependent on the application of estimates and assumptions and require management's most difficult, subjective, or complex judgments:

- Insurance liabilities;
- Valuation of investments, including derivatives; and
- Taxes on income, including valuation allowances

Recent Accounting Pronouncements

Changes to U.S. GAAP are established by the Financial Accounting Standards Board ("FASB") in the form of an Accounting Standards Update ("ASU") to the Accounting Standards Codification ("ASC"). We consider the applicability and impact of all ASUs. ASUs listed below include those that have been adopted during the current fiscal year and/or those that have been issued but not yet adopted as of the date of this filing. ASUs not listed below were assessed and determined to be either not applicable or not material.

ASUs issued but not yet adopted as of June 30, 2024:

Standard	Description	Effective date and method of adoption	Effect on the financial statements or other significant matters
ASU 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures	This ASU improves reportable segment disclosure requirements, primarily through enhanced disclosures regarding a company's significant segment expenses and certain other items. The update will also require expanded disclosures regarding the chief operating decision maker (CODM) and the information they are provided when assessing segment performance and allocating resources.	Effective for annual reporting periods beginning January 1, 2024, and interim reporting periods beginning January 1, 2025, using the retrospective method. Early adoption is permitted	The update is expected to expand the Company's disclosures but will not have an impact on the Company's financial position or results of operations.
ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures	This ASU improves income tax disclosure requirements by requiring 1. the use of consistent categories and greater disaggregation of information in the rate reconciliation and 2. income taxes paid disaggregated by jurisdiction.	Effective for annual reporting periods beginning January 1, 2025, and is required to be applied prospectively with the option of retrospective application. Early adoption is permitted.	The update is expected to expand the Company's disclosures but will not have an impact on the Company's financial position or results of operations.

Segment and Product Overview

Our business is comprised of two major blocks of in-force policies, which we refer to as the "Retained Business" and the "Ceded Business". The Retained Business consists of variable annuity products with guaranteed lifetime withdrawal benefit features as well as smaller blocks of variable annuity products with certain other living benefit and death benefit features. The Retained Business also includes variable universal life and fixed payout annuity products. The Retained Business is actively managed by FLIAC management and the Company retains the full economic benefits and risks. The Retained Business consists of variable annuity contracts originated between 1993 – 2010. These products allow the holder to direct investments into certain separate account funds to receive tax deferred build-up within the contract. Most of the contracts have optional living benefit riders, commonly known as guaranteed minimum withdrawal benefits, which entitle the holder to elect to withdraw a guaranteed amount from the contract while alive, irrespective of the balance in their separate account. Almost all of the contracts also offer a guaranteed amount payable to a beneficiary upon the death of the holder, which is commonly known as a guaranteed minimum death benefit.

The Ceded Business represents certain business (primarily registered index linked-annuities and fixed annuities, which includes fixed indexed and fixed deferred annuities, and other variable annuities) where 100 percent of the assets and liabilities have been fully ceded to Prudential Insurance and Pruco Life under existing coinsurance and modified coinsurance agreements. The Ceded Business will continue to impact certain line items within the Company's financial statements but will not have a material impact to stockholders' equity or net income and will represent the economic impact assumed by Prudential Insurance and Pruco Life.

Changes in Financial Position

The following is a discussion regarding changes in the financial position of the Company by reportable segment.

Retained Business

Assets decreased \$605 million to \$26,620 million at June 30, 2024 from \$27,225 million at December 31, 2023. The decrease was primarily driven by lower separate account assets resulting from net redemptions and the impact of higher interest rates, partially offset by favorable equity market movements. Also contributing to the decline between periods was a decrease in the fair value of fixed maturity securities due to the impact of higher interest rates.

Liabilities decreased \$608 million to \$25,255 million at June 30, 2024 from \$25,863 million at December 31, 2023. The decrease was primarily driven by lower separate account liabilities, corresponding to the decrease in separate account assets, as discussed above, partially offset by higher liabilities associated with secured borrowing arrangements..

Equity increased \$3 million to \$1,365 million at June 30, 2024 from \$1,362 million at December 31, 2023, driven by the year-to-date impacts of net income of \$115 million and the \$38 million net-of-tax improvement in accumulated other comprehensive loss related to movements in our own-credit risk (OCR) on the fair value of insurance liabilities. Mostly offsetting the increase was a \$150 million dividend payment to FGH during the six months ended June 30, 2024

Ceded Business

Assets increased \$47 million to \$4,375 million at June 30, 2024 from \$4,328 million at December 31, 2023. The increase was driven by higher derivative fair values related to equity options, partially offset by declines in reinsurance recoverables and the deposit asset, which generally correspond with lower insurance liabilities.

Liabilities increased \$47 million to \$4,375 million at June 30, 2024 from \$4,328 million at December 31, 2023. The increase was primarily driven by an increase in the net modified coinsurance payable resulting from higher fair values related to investments.

There was no equity within our Ceded Business at both June 30, 2024 and December 31, 2023 as the assets are fully offset by the liabilities.

Results of Operations

INCOME (LOSS) FROM OPERATIONS BEFORE INCOME TAXES

Quarter-to-Date Comparison to Prior Period

Retained Business

Loss from operations before income taxes was \$33 million for the three months ended June 30, 2024 compared to income from operations before income taxes of \$155 million for the three months ended June 30, 2023. The change was driven primarily by the impact of higher credit spreads which resulted in higher investment losses related to fixed maturity securities and less favorable movements in the fair value of insurance liabilities, excluding changes in OCR.

Ceded Business

There was no impact to the income from operations before income taxes as all revenues and expenses are ceded to Prudential Insurance or Pruco Life.

Year-to-Date Comparison to Prior Period

Retained Business

Income from operations before income taxes was \$136 million for the six months ended June 30, 2024 compared to income from operations before income taxes of \$162 million for the six months ended June 30, 2023. The decrease was primarily driven by higher equity-related losses in our derivatives portfolio resulting from equity market movements which more than offset the favorable impact on the fair value of insurance liabilities, excluding changes in OCR.

Ceded Business

There was no impact to the income from operations before income taxes as all revenues and expenses are ceded to Prudential Insurance or Pruco Life.

REVENUES, BENEFITS, AND EXPENSES

Quarter-to-Date Comparison to Prior Period

Retained Business

Revenues were \$24 million for the three months ended June 30, 2024 compared to \$(197) million during the three months ended June 30, 2023. The change was primarily driven by lower investment losses on equity derivatives due to less favorable equity market movements.

Benefits and expenses were \$57 million in the three months ended June 30, 2024 compared to \$(352) million during the three months ended June 30, 2023. The change was driven by less favorable decreases in the fair value of insurance liabilities, excluding changes in OCR, resulting from less favorable equity market movements.

Ceded Business

There was no impact to the income from operations before income taxes as all revenues and expenses are ceded to Prudential Insurance or Pruco Life.

Year-to-Date Comparison to Prior Period

Retained Business

Revenues were \$(198) million for the six months ended June 30, 2024 compared to \$36 million for the six months ended June 30, 2023, the change between periods was primarily driven by higher investment losses on fixed maturity securities due to higher interest rates.

Benefits and expenses were \$(334) million for the six months ended June 30, 2024 compared to \$(126) million for the six months ended June 30, 2023, the change between periods was primarily driven by more favorable declines in the fair value of insurance liabilities, excluding changes in OCR, during the six months ended June 30, 2024 due to the impacts of higher interest rates.

Ceded Business

There was no impact to the income from operations before income taxes as all revenues and expenses are ceded back to Prudential Insurance or Pruco Life.

Income Taxes

For information regarding income taxes, see Note 7 to the Consolidated Unaudited Interim Financial Statements.

Liquidity and Capital Resources

This section supplements and should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources" included in the Company's Annual Report on Form 10-K for the year ended December 31, 2023.

Overview

Liquidity is a measure of a company's ability to generate cash flows sufficient to meet the short-term and long-term cash requirements of the Company. Capital refers to the long-term financial resources available to support the operations of our business, fund business growth, and provide a cushion to withstand adverse circumstances. Our ability to generate and maintain sufficient liquidity and capital depends on the profitability of our business, general economic conditions, our ability to borrow and our access to capital markets.

Effective and prudent liquidity and capital management is a priority across the organization. Management monitors the liquidity of the Company on a daily basis and projects borrowing and capital needs over a multi-year time horizon. We use a Risk Appetite Framework ("RAF") to ensure that all risks taken by the Company aligns with our capacity and willingness to take those risks. The RAF provides a dynamic assessment of capital and liquidity stress impacts and is intended to ensure that sufficient resources are available to absorb those impacts. We believe that our capital and liquidity resources are sufficient to satisfy the capital and liquidity requirements of the Company.

Our businesses are subject to comprehensive regulation and supervision by domestic and international regulators. These regulations currently include requirements (many of which are the subject of ongoing rule-making) relating to capital, leverage, liquidity, stress-testing, overall risk management, credit exposure reporting and credit concentration. For information on these regulatory initiatives and their potential impact on us, see "Business - Regulation" and "Risk Factors" included in the Company's Annual Report on Form 10-K for the year ended December 31, 2023.

Capital

We manage FLIAC to regulatory capital levels and utilize the risk-based capital ("RBC") ratio as a primary measure of capital adequacy. RBC is calculated based on statutory financial statements and risk formulas consistent with the practices of the National Association of Insurance Commissioners ("NAIC"). RBC considers, among other things, risks related to the type and quality of the invested assets, insurance-related risks associated with an insurer's products and liabilities, equity market and interest rate risks and general business risks. RBC determines the minimum amount of capital required of an insurer to support its operations and underwriting coverage. The ratio of a company's Total Adjusted Capital ("TAC") to RBC is the

corresponding RBC ratio. RBC ratio calculations are intended to assist insurance regulators in measuring an insurer's solvency and ability to pay future claims. The reporting of RBC measures is not intended for the purpose of ranking any insurance company or for use in connection with any marketing, advertising or promotional activities, but is available to the public. The Company's capital levels substantially exceed the minimum level required by applicable insurance regulations. Our regulatory capital levels may be affected in the future by changes to the applicable regulations, proposals for which are currently under consideration by both domestic and international insurance regulators.

The regulatory capital level of the Company can be materially impacted by interest rate and equity market fluctuations, changes in the values of derivatives, the level of impairments recorded, and credit quality migration of the investment portfolio, among other items. In addition, the reinsurance of business or the recapture of business subject to reinsurance arrangements due to defaults by, or credit quality migration affecting, the reinsurers or for other reasons could negatively impact regulatory capital levels. The Company's regulatory capital level is also affected by statutory accounting rules, which are subject to change by each applicable insurance regulator.

Dividends and Distributions to Parent

During the first quarter of 2024, a \$150 million dividend was approved by the Company's board of directors, \$75 million of which was considered an ordinary dividend and was not subject to approval by the Arizona Department of Insurance and Financial Institutions ("DIFI") prior to payment and was accrued for as of March 31, 2024. The other \$75 million was conditioned upon the Company receiving written approval from the Arizona DIFI prior to payment and was not accrued for as of March 31, 2024. In April 2024, the Company received written approval from the Arizona DIFI and the \$150 million dividend was distributed in cash to FGH in the second quarter of 2024.

During the first quarter of 2023, the Company established a \$45 million distribution payable to its parent company, FGH, as a result of updated information regarding certain tax assets related to the acquisition of FLIAC, which resulted in an offsetting reduction to "Additional paid-in capital". The distribution payable was settled during the second quarter of 2023.

Liquidity

Our liquidity is managed to ensure stable, reliable and cost-effective sources of cash flows to meet all of our obligations. Liquidity is provided by a variety of sources, as described more fully below, including portfolios of liquid assets. Our investment portfolios are integral to the overall liquidity of the Company. We use a projection process for cash flows from operations to ensure sufficient liquidity to meet projected cash outflows, including claims.

Liquidity is measured against internally-developed benchmarks that take into account the characteristics of both the asset portfolio and the liabilities that they support. We consider attributes of the various categories of liquid assets (for example, type of asset and credit quality) in calculating internal liquidity measures to evaluate our liquidity under various stress scenarios, including company-specific and market-wide events. We continue to believe that cash generated by ongoing operations and the liquidity profile of our assets provide sufficient liquidity under reasonably foreseeable stress scenarios.

The principal sources of the Company's liquidity are premiums and certain annuity considerations, investment and fee income, investment maturities, sales of investments, borrowings from its parent and affiliates, and banking relationships through secured or unsecured agreements. The principal uses of that liquidity include benefits, claims, and payments to policyholders and contractholders in connection with surrenders, withdrawals and net policy loan activity. Other uses of liquidity include commissions, general and administrative expenses, purchases of investments, the payment of dividends and returns of capital to the parent company, hedging and reinsurance activity and payments in connection with financing activities.

In managing liquidity, we consider the risk of policyholder and contractholder withdrawals of funds earlier than our assumptions when selecting assets to support these contractual obligations. We also consider the risk of future collateral requirements under stressed market conditions in respect of the derivatives we utilize.

Liquid Assets

Liquid assets include cash and cash equivalents, short-term investments, and fixed maturity securities. As of June 30, 2024 and December 31, 2023, the Company had liquid assets of \$5.8 billion and \$6.2 billion, respectively, which includes \$1.5 billion of modified coinsurance assets contained within the Ceded business, for each respective period. As of June 30, 2024 and

December 31, 2023, the portion of liquid assets comprised of cash and cash equivalents and short-term investments was \$0.4 billion and \$1.0 billion, respectively.

Intercompany Liquidity Agreement

FLIAC entered into an intercompany liquidity agreement with FGH that allows the Company to borrow or loans funds of up to \$300 million to meet the short-term liquidity and other capital needs of itself and FGH and its affiliates.

The Company did not borrow or loan any funds under the agreement during the six months ended June 30, 2024. During the six months ended June 30, 2023, the Company borrowed a total of \$200 million of funds under the agreement, of which \$80 million was outstanding at June 30, 2023 but was subsequently repaid in full, plus interest, in July 2023.

Liquidity Regarding Hedging Activities

The hedging portion of our risk management strategy for the Retained Business is being managed within the Company. We enter into a range of exchange-traded, cleared, and other OTC derivatives in order to hedge market sensitive exposures against changes in certain capital market risks. The portion of the risk management strategy comprising the hedging portion requires access to liquidity to meet the Company's payment obligations relating to these derivatives, such as payments for periodic settlements, purchases, maturities and terminations. These liquidity needs can vary materially due to, among other items, changes in interest rates, equity markets, mortality, and policyholder behavior.

The hedging portion of the risk management strategy may also result in derivative-related collateral postings to (when we are in a net pay position) or from (when we are in a net receive position) counterparties. The net collateral position depends on changes in interest rates and equity markets related to the amount of the exposures hedged. Depending on market conditions, the collateral posting requirements can result in material liquidity needs when we are in a net pay position.

Secured Borrowing Arrangements

In the normal course of business, we may enter into repurchase agreements and securities lending transactions with unaffiliated financial institutions, which are typically large or highly rated, to earn spread income and facilitate trading activity. Under these agreements, the Company transfers securities to the counterparty and receives cash as collateral. The cash received is generally invested in short-term investments and fixed maturity securities.

A liability representing the amount that the securities will be repurchased is recorded in "Liabilities associated with secured borrowing arrangements" in our consolidated statement of financial position. As of June 30, 2024, the liabilities associated with our outstanding repurchase agreements and securities lending transactions were \$1,121 million and \$2 million, respectively.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

As of June 30, 2024, there have been no material changes in our economic exposure to market risk from December 31, 2023, a description of which may be found in our Annual Report on Form 10-K for the year ended December 31, 2023, Item 7A, "Quantitative and Qualitative Disclosures about Market Risk," filed with the SEC. See Item 1A, "Risk Factors" included in the Annual Report on Form 10-K for the year ended December 31, 2023, for a discussion of how difficult conditions in the financial markets and the economy generally may materially adversely affect our business and results of our operations.

Item 4. Controls and Procedures

In order to provide reasonable assurance that the information we must disclose in our filings with the SEC is recorded, processed, summarized and reported on a timely basis, the Company's management, including our Chief Executive Officer and Chief Financial Officer, has reviewed and evaluated the effectiveness of our disclosure controls and procedures, as defined in Securities Exchange Act of 1934, as amended ("Exchange Act") Rule 15d-15(e), as of June 30, 2024. Based on such evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of June 30, 2024 our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended June 30, 2024 which have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

Our management, including our principal executive officer and principal financial officer, does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent or detect all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings

See Note 9 to the Unaudited Interim Financial Statements under "Litigation and Regulatory Matters" for a description of certain pending litigation and regulatory matters affecting us, and certain risks to our business presented by such matters, which is incorporated herein by reference.

Item 1A. Risk Factors

You should carefully consider the risks described under "Risk Factors" in the Company's Annual Report on Form 10-K for the year ended December 31, 2023. These risks could materially affect our business, results of operations or financial condition, or cause our actual results to differ materially from those expected or those expressed in any forward-looking statements made by, or on behalf of, the Company. These risks are not exclusive, and additional risks to which we are subject include, but are not limited to, the factors mentioned under "Forward-Looking Statements" and the risks of our businesses described elsewhere in this Quarterly Report on Form 10-Q.

Item 5. Other Information

Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers

On August 9, 2024, Greta Hager, 44, was appointed as Senior Vice President, Chief Financial Officer, and member of the Board of Directors of Fortitude Life Insurance & Annuity Company ("FLIAC"). Ms. Hager succeeds Kai Talarek, who is taking on the responsibilities of Chief Growth & Optimization Officer of FGH Parent, L.P. ("FGH" and, together with its subsidiaries, "Fortitude Re"). Ms. Hager's appointments and Mr. Talarek's departures as officer and director of FLIAC become effective on August 19, 2024.

We believe Ms. Hager will be a valuable member of FLIAC's management team and Board because of her deep experience in the insurance industry and key leadership roles within finance. Ms. Hager will also serve as Senior Vice President, Chief Financial Officer of FGH. Ms. Hager has more than 20 years of experience as a finance professional, most recently as the Head of Financial Planning and Analysis at Mass Mutual, a position she held from July 2019 until her departure to join Fortitude. Prior to that experience she served in various strategic leadership roles in both finance and accounting at AIG. Ms. Hager began her career at the public accounting firm Grant Thornton where she served as an audit professional as well as a leader within their National Professional Standards Group. Ms. Hager holds a B.S. in Business Administration from the University of Houston and was licensed as a Certified Public Accountant in Texas.

FGH provides personnel to FLIAC, including Ms. Hager, pursuant to a Services Agreement between FLIAC and FGH, and FGH determines and pays Ms. Hager's salary, bonuses, and all other compensation. There are no family relationships among Ms. Hager and any of FLIAC's directors and executive officers. Ms. Hager is not a party to any material plan, contract or arrangement (whether or not written) with FLIAC, and there are no arrangements or understandings between Ms. Hager and any other person pursuant to which she was selected to serve as an officer or director of FLIAC. Ms. Hager is not a participant in any related party transaction required to be reported pursuant to Item 404(a) of Regulation S-K, and there are no material plans, contracts or arrangements (whether or not written) to which Ms. Hager participates that were entered into or materially amended in connection with her appointment.
